Birth of a Butterfly

A mother butterfly lays all her eggs,
Out pops a caterpillar, crawling on its legs.

The caterpillar first is rather thin,
Then it eats till it bursts through its skin.

After growing nice and big,
The caterpillar climbs on a leaf or twig.

It makes a shell where it hangs inside,
The shell then cracks, and the parts divide.

Inside the shell, a change is going on,
The form of the caterpillar now is gone.

When the shell opens, what comes out?
A beautiful butterfly fluttering about!
